

Health, Safety, Quality and Environmental Protection Policy

Revision Date: October 4, 2016

Maersk Line, Limited (MLL) has established a health, safety, quality and environmental (HSQE) management system that includes the following objectives:

1. Provide for safe practices in ship operation;
2. Provide for a safe working environment;
3. Establish safeguards against all identified risks;
4. Continually improve the effectiveness of the HSQE management system, skills, and performance of personnel ashore and aboard ships.

MLL will achieve its HSQE objectives through the following measures:

1. Establishing documented procedures for safe operations and a safe working environment.
2. A commitment to continually improving HSQE performance and to preventing injury and ill health of shore-side and vessel personnel by:
 - a. Ensuring the availability of information and of necessary resources to achieve objectives and HSQE targets;
 - b. Conducting drills and training to ensure personnel are prepared for emergencies related to safety and environmental protection;
 - c. Conducting both shore-side and shipboard audits to determine the effectiveness of the HSQE management system;
 - d. Providing physical and health screenings;
 - e. Annually reviewing the HSQE objectives and targets.
3. A commitment to preventing pollution.
4. A commitment to operating in compliance with applicable legal requirements, mandatory rules and regulations, and other requirements to which MLL subscribes.

This policy has been implemented and is maintained at all levels of the organization, both ashore and afloat. Copies of the policy are posted on the MLL website, all owned/operated vessels, and throughout the office.
