Company Overview

Maersk Line, Limited (MLL) is an American company with offices in Norfolk and Reston, Virginia that provides U.S. flag transportation, ship management and technical services to government and commercial customers. In 1983, the company won its first government contract to convert and operate five Maritime Prepositioning Ships (MPS). Since then, MLL has managed and operated more than 100 vessels of varying types and sizes for its customers.

As a business within Maersk Group, MLL uniquely combines maritime expertise and global intermodal capability and shares the same deeply ingrained values and culture that guides the way we do business every day.

Through our parent company, we have an unmatched global presence, with offices in 130 countries and more than 120,000 employees worldwide. Our colleagues are our most valued assets, and we try to create a challenging environment where everyone can manage their working lives and plan their careers according to their skills, achievements and possibilities. We continuously strive to attract talented people who are excited to work in an international environment. The size of our company and the

span of our business activities enable us to offer a wide range of career paths for all employees. We foster growth for people who thrive in a team-oriented environment, strive for excellence, and create innovative solutions to difficult problems.

Since MLL's inception, we have dedicated ourselves to serving our country through superior service to our customers. MLL colleagues participate on numerous governmental boards and panels that promote safety and security at sea and support the education and development of mariners and professionals in the U.S. maritime industry. We seek everyday to build greater trust in our maritime and transportation services and strengthen the partnership with our customers for years to come.
